NEW QUESTION 241

Which two statements are true regarding upgrading from a Distributed vCenter Server 5.x to vCenter Server 6.x? (Choose two.)

- A. vCenter Single Sign-On becomes part of the Platform Services Controller.
- B. The vCenter Server service is not migrated during the upgrade process.
- C. The vSphere License Service is migrated to the new vCenter Server 6.x instance.
- D. vCenter inventory Service becomes part of the Platform Services Controller.

Answer: AB

Explanation:

vCenter Server and vCenter Single Sign-On are the only services that are not migrated. vCenter Single Sign-On instances are upgraded in place to become part of an external Platform Services Controller if they are deployed on a system other than the system where the vCenter Server resides.

NEW QUESTION 242

An administrator has a virtual machine (VM) that uses a shared USB device. Which option will allow the VM to utilize vMotion while retaining the maximum possible functionality?

- A. Disable the USB device from the VM.
- B. Remove the device from the VM.
- C. Configure the VM to support vMotion while the device is connected.
- D. Enable migration support for the individual USB device's.

Answer: C

NEW QUESTION 243

An administrator is configuring an identity source for Single Sign-On. The administrator will use the machine that Single Sign-on is running on, but does not want all users on the machine to be visible to SSO. Which identity Source meets this requirement?

- A. Local OS
- B. Active Directory as an LDAP service
- C. OpenLDAP
- D. Active Directory (Integrated Windows Authentication)

Answer: D

NEW QUESTION 244

An administrator is building a large virtual machine that will require as many vCPUs as the host can support. An ESXi 6.x host has these specifications:

- Four 24-core Intel Xeon Processors
- 256 GB of Memory
- 512 GB Local disk space using VMFS5

What is the maximum number of virtual CPUs that the virtual machine can be allocated?

- A. 64
- B. 96
- C. 128
- D. 192

Answer: C

Explanation:

<https://www.vmware.com/pdf/vsphere6/r60/vsphere-60-configuration-maximums.pdf> (page 9)

NEW QUESTION 245

An administrator wants to configure an ESXi 6.x host to use Active Directory (AD) to manage users and groups. The AD domain group ESX Admins was previously created. Which two conditions should be considered when planning this configuration? (Choose two.)

- A. If administrative access for ESX Admins is not desired, an alternate AD group must be used.
- B. The users in ESX Admins are granted administrative privileges in vCenter Server.
- C. The users in ESX Admins are not restricted by Lockdown Mode.
- D. An ESXi host provisioned with Auto Deploy cannot store AD credentials.

Answer: AD

NEW QUESTION 246

An administrator is implementing a vSphere 6.x environment containing one vCenter and five ESXi hosts. The administrator has just finished deploying the vCenter Server appliance with an embedded Platform Services Controller (PSC) and need to ensure that default security certificates within the vSphere 6.x environment are replaced with new certificates. What should the administrator do to complete this task the least administrative effort?

- A. Replace the VMCA root certificate before adding the ESXi hosts to vCenter Server.
- B. Create ESXi host security certificates using the SSL Thumbprint mode to ensure consistency among all hosts.
- C. Add the ESXi hosts to vCenter Server before updating the VMCA root certificate on the PSC.
- D. Make VMCA an Intermediate Certificate Authority to ensure each added ESXi hosts receives the same certificate.

Answer: A

NEW QUESTION 247

Which two conditions would prevent an administrator from upgrading an existing vCenter Server Appliance to vSphere 6.x? (Choose two.)

- A. The administrator did not export the appliance configuration.
- B. The ESXi Host that the appliance will run on has not been placed into Maintenance Mode.
- C. The administrator is using an appliance with an embedded Platform Services Controller.
- D. The appliance has been configured to use an external Single Sign-On server.

Answer: AD

NEW QUESTION 248

An administrator is creating a new Content Library. It will subscribe to another remote Content Library without authentication enabled. Optimal performance is desired for the configuration. What two steps should be taken to set up the library?

- A. The library should be published externally.
- B. The Subscription URL should be provided.
- C. A datastore should be used for this library.
- D. A file system should be used for this library.

Answer: BC

NEW QUESTION 249

When operating with Distributed Resource Scheduler (DRS) and Distributed Power Management (DPM), what two statements explain the impact of disabling vSphere High Availability admission control? (Choose two.)

- A. DRS will evacuate virtual machines from hosts and places in maintenance or standby modes regardless of the impact this might have on failover requirements.
- B. VMware DPM will place hosts in standby mode even if doing so violates failover requirements.
- C. DRS does not evacuate virtual machines from a host for the purpose of placing it in maintenance or standby modes if placing the host in this state would violate failover requirements.
- D. VMware DPM does not place hosts in standby mode if doing so would violate failover requirements.

Answer: AB

NEW QUESTION 250

Which VMware Single Sign-On component handles STS authentication requests?

- A. Identity Management Service

- B. Administration Server
- C. VMware Directory Service
- D. Security Token Service

Answer: A

NEW QUESTION 251

An administrator observes that virtual machine storage activity on an ESXi 6.x host is negatively affecting virtual machine storage activity on another host that is accessing the same VMFS Datastore. Which action would mitigate the issue?

- A. Enable the Dynamic Queue Depth Throttling option.
- B. Configure Storage DRS.
- C. Enable Storage I/O Control.
- D. Configure the Disk.SchedNumReqOutstanding parameter.

Answer: C
