

- C. Edit the locked.properties file in the SSL Gateway Configuration folder.
- D. Edit the certificate to force https only connections.

Answer: C

QUESTION 14

An administrator is configuring RADIUS authentication for a View implementation and enters the RADIUS server host name into the View Administrator console. Which additional information must be entered into View Administrator to properly configure RADIUS?

- A. Port number, authentication type, and shared secret
- B. DNS server, port number, and shared secret
- C. Authentication type, shared secret, and public key
- D. Public key, authentication type, and shared secret

Answer: A

QUESTION 15

An administrator is creating a pool of desktops for a group of developers. The administrator needs to provide control to a user from the group to manage the recompose and refresh operations. The user's controls must apply only to the developer pool. What should the administrator do?

- A. Create a developer folder, add the developer pool, and assign a user with the Inventory Administrators role to the folder.
- B. Create the developer pool and assign the Manage Desktops global privilege to the virtual desktops.
- C. Create the developer pool and assign the Inventory Control global privilege to the virtual desktops.
- D. Create a developer folder, add the desktops, and assign a user with the Manage Desktops role to the folder.

Answer: A

QUESTION 16

A View environment consists of a Connection Server named connect-01 and a security server named security-01. An administrator needs to configure RSA SecurID authentication for external users. Internal users must not be prompted for the RSA SecurID token code. What should the administrator do?

- A. Configure 2-factor authentication on the security-01 security server.
- B. Configure 2-factor authentication on the connect-01 Connection Server.
- C. Add a new Connection Server named connect-02 for internal users.
Configure 2-factor authentication on the connect-01 Connection Server.
- D. Add a new security server named security-02 for internal users.
Configure 2-factor authentication on the security-01 security server.

Answer: C

QUESTION 17

An organization's ThinApp packaged applications are being delivered to both physical and virtual desktops using a login script. The administrator has implemented Workspace Portal across the organization. Instead of using login scripts, the administrator needs to provide the applications to users from the Workspace Portal application catalog. Which ThinApp utility and parameter should the administrator use?

- A. relink.exe -a
- B. vregtool.exe -h
- C. vregtool.exe -a
- D. relink.exe -h

Answer: D

QUESTION 18

An application was packaged using ThinApp and access is restricted to an Active Directory group called Customer Services. An administrator needs to remove this restriction. What should the administrator do to remove this restriction with the least effort?

- A. Repackage the application, selecting Everyone from the Setup Capture wizard.
- B. Remove the PermittedGroups section from package.ini and execute build.bat.
- C. Change PermittedGroups=1 to 0 within package.ini and execute sbmerge.exe.
- D. Change PermittedGroups=0 to 1 within package.ini and execute sbmerge.exe.

Answer: B
